New Coil Assembly

- **Advanced Technology:** Entire coil assembly replaced with a new USA-made unit, featuring a vented end cap for smooth operation in cold start conditions.
- **Enhanced Performance:** Upgraded technology ensures superior functionality and reliability in all driving environments.

Control Valve Body & Spool

- **Precision Engineering:** Proprietary in-house manufactured DLC* spools replace all control valve spools for optimal performance.
- **Superior Sealing:** Precision-ground valve bodies ensure exact tolerances, enhancing oil direction and injector operation.

Intensifier

- **Durable Construction:** Upgraded DLC* coated plungers provide unmatched durability and reliability.
- **Extreme Conditions Ready:** Intensifier body and plunger are precision-match honed to withstand extreme pressures and temperatures.

Nozzle

- **Thorough Inspection:** Remanufactured nozzle assemblies undergo chemical treatment and microbrushing to remove carbon and fuel residues before inspection and testing.
- **Perfect Fit:** Seat radius is meticulously scrubbed for proper sealing to the cone nut, and orifice holes are 100% inspected to meet acceptance criteria.
- **OEM Standards:** Any remanufactured nozzles that do not meet Original Equipment specifications are replaced with new nozzles.

***Diamond-Like Carbon (DLC) Coating:** DLC coating offers high hardness, low friction, and corrosion resistance, preventing pitting, galling, seizing, and failing. This advanced coating ensures the longevity and reliable performance of all injector components.
